Suggestions for using CVC Stories Reading Comprehension

As a whole class shared teaching and learning experience:

- display a simple reading passage on an interactive white board
- model how to read the text without displaying the written questions
- discuss the text, ask questions orally and talk about the answers
- introduce multiple choice questions and model how to answer them by choosing and shading a bubble

As a guided teaching and learning experience:

- in a small group, each child has a copy of a simple reading text
- teacher guides the reading and explicitly teaches use of strategies to
- decode and understand text, and to answer questions, i.e. sight words, stretch out the sounds, read it again, etc.
- teacher gives prompts when necessary so children experience success

As a buddy learning experience:

- two children reading at a similar level have a copy of the same text and take turns to read by the sentence
- a more fluent reader reads the text first, and the second child listens and repeats what has been read
- children read and discuss questions before selecting answers together

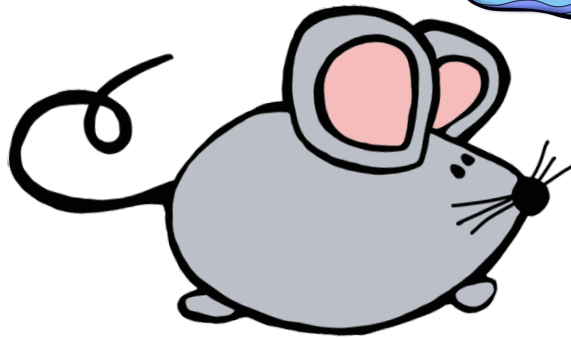

As an independent learning experience:

- child reads the text, colors answer bubbles and draws the picture
- these simple texts are based heavily on cvc words and include a few high frequency sight words
